

E2SOL is looking for two summer interns for our SMART Building Architecture and Operations Team. We provide Fortune 1000 companies, universities, and municipalities comprehensive renewable energy advisory and full project development services to implement renewable energy solutions to all customers.

As a SMART Building Architect Team Intern, you will assist in developing creative design solutions. This includes:

- Design of Creative Solar Carport Structures for Residential and Commercial Applications,
- SMART Residential / Commercial Architectural Design,
- Develop Digital Renderings

Applicants should have academic and/or work experience in the fields of sustainability, renewable energy, engineering, clean tech, environment, economics, business, and/or finance.

The internship position is open to start at any time prior to May 2023 and will convert to the RI CLEAN ENERGY Internship Program commencing in May and concluding in August, unless otherwise agreed upon.

Please apply via the RI Clean Energy Internship portal, and feel free to send follow-up questions to Anthony Baro, Principal at abaro@e2sol.com.
